

Diving lights

Aida Light for technical diving

- Li-ion rechargeable battery housing, equipped with belt clip, last for 8 hours continuous use. The housing dimensions are: Length=20 cm, Diameter=6 cm and weight 1,6 kg.
- Connection plug for charging is located under the watertight cover. The cover is connected to the housing with a quick lock ring. There are two O-rings to secure the tightness. Only one o-ring would secure the water tightness.
- The light is equipped with mechanical rotational switch, specially developed for this light. The switch includes 2 O-rings, securing well the water tightness. (Optionally a piezo switch)
- The lighthead is equipped with 5 leds, giving 1200 lm of total power. The light angle is 4,5 degrees, which fits perfectly for technical diving.
- The Goodman handle, including suitable adjustment, is designed to fit to hand either with dry glove or bare hand depending of the diving gear setup.
- The Aida light is small and light, perfect to take with to diving trips.
